Additional Information

The Health Information Form – CNICCYP 1700/52 is used as a screening tool by the CYP to determine whether your child requires additional documentation and resources to support their participation in CYP. If you answer yes to any question(s) on this form, the CYP Director will contact you to obtain additional information to support your child. Depending on your child's needs, the CYP Director may also refer your child to the Inclusion Action Team (IAT). The Inclusion Action Team (IAT) is a team of professionals that collaborates to support the full inclusion of children with diagnosed or undiagnosed disabilities, differing abilities, or special needs. These experts in the fields of medicine, therapy, family services, special education, and general education help CYPs locate resources for families and identify reasonable accommodations that can be implemented to support a child's success in that CYP. If the CYP Director feels your child may benefit from a referral for IAT support, you are always consulted first and encouraged to participate in the discussion. You are the expert on your child, and as such, you are the most valuable member of the IAT.

Additional documentation required varies depending on each child's needs, but may include the following items:

Emergency Action Plan (EAP): The EAP tells CYP staff how to respond to your child or youth's needs in case of a medical emergency (e.g., a youth with a severe peanut allergy accidentally eats peanut butter). EAPs must be developed, completed and signed by their health care providers. EAPs may be provided by the child or youth's health care provider or the CYP can provide an EAP template for the health care provider to use.

Medication Administration Form: This form is required for all children who need administration of prescription medication at the CYP and must have the following signatures: (1) health care provider signature on written instructions, including the type of medication, dosage, frequency, and duration of the administration period (e.g., 3 weeks, 1 year, indefinite), and (2) parent signature, giving consent for authorized employees to administer medication while the child is at the CYP. If the form is for emergency response medication, an EAP is also required.

Individualized Education Program (IEP) or Individualized Family Service Plan (IFSP): Children or youth who have received (or are receiving) early intervention or special education services from a school district will have an IEP and/or IFSP. Families are strongly encouraged, but not required, to provide a copy of the IEP or IFSP to the CYP, as this can help the program develop accommodations to meet the child or youth's needs.

Definitions:

Food Allergy: When a child has a food allergy, his/her body responds to food as if it were a threat. The body's immune system response can be mild or, in rare cases, associated with a severe and life-threatening reaction called anaphylaxis. Allergic reactions are highly unpredictable. The severity of one attack does not predict the severity of the next attack. The only way to prevent a life-threatening reaction is strict **avoidance** of the allergen.

Food Intolerance: When a child has a food intolerance, it is a reaction of the digestive system and is not dangerous. Although a child may experience gas, bloating, abdominal pain and/or diarrhea, the reactions will pass and the child is not in danger. Children with food intolerances likely do not have prescribed medications for their condition and do not need an EAP. Some common food intolerances are lactose and gluten.
